

AEGIS EXCELLENCE AWARD for Outstanding Performance

Presented to: **ECONCO, Inc.**

Citation:

Through the fourth quarter of 1994, ECONCO, Inc. of Woodland, CA performed in an outstanding manner in supplying rebuilt switch tubes for the AEGIS Program. ECONCO developed improvements to the filament design and delivered rebuilt tubes with a thirty percent longer life than production switch tubes. ECONCO also consistently delivered rebuilt switch tubes ahead of contract schedule. Through the company's superior failure analysis and quality assurance procedures, ECONCO, Inc. has achieved a scrap rate that is four times less than that of other switch tube rebuilders. These improvements have ensured that the AEGIS Weapon System will continue to be fully supported at substantially reduced lifetime costs.

Rear Admiral
USN

 
Vice President
Naval Systems, Lockheed Martin

Award Excerpt:

“ECONCO delivered rebuilt tubes with a 30 percent longer life than production tubes.”

Rebuilt AEGIS Radar tube with U.S. Navy Excellence Award to ECONCO for achieving significantly longer operating life than the original tubes.
